

**FIELD DAY TRAINING PROG ON BGREI:** A one Day Training programme for successful farmers covered under BGREI was organized at the field level after harvest of their paddy. The subject matter included sound and scientific agricultural practices, the technologies adopted, the experiences they felt realized and the innovations they adopted. It was rather an interface of the successful farmers with the agricultural experts and district level officers. Sharing of past experiences faced by the farmers among themselves was another interesting chapter of the training. The trainee farmers were conceptualized on differences between the traditional practices they used and the inputs they got and the Present technologies, Practices, Seeds, Plants, Processes etc they adopted and the more input they got.
